

**SMART
REDACTION**

Let your VDR do more - **Redact within the data room**

As an industry leading due diligence software provider, we're always looking to accelerate and streamline processes for our clients. That's why we're introducing Smart Redaction.

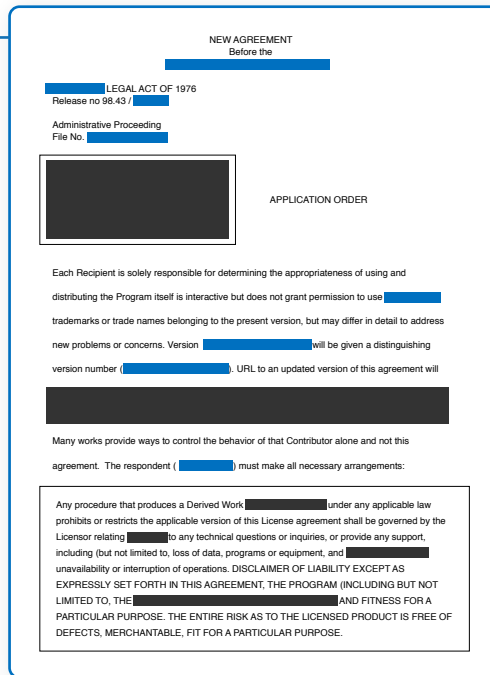

Smart Redaction minimises outsourcing, negating the need for external providers to have access to confidential data, thereby speeding up the due diligence process and controlling costs. It also helps you to maintain compliance with data protection laws and avoid disclosing sensitive information to those that shouldn't see it, whilst assisting you in maintaining control of your deal.

Smart Redaction combines intelligent automation with an intuitive interface:

AUTOMATIC REDACTION

Redact automatically based upon:

- **Pre-loaded regular expressions:**
 - ✓ **Email addresses**
 - ✓ **Phone numbers**
 - ✓ **Social security numbers**
 - ✓ **Dates**
- **Custom regular expressions**
- **Specified lists of search terms**

MANUAL REDACTION

Functionality easily controlled on the fly, directly within the document. Efficiently redact by:

- ✓ **Highlighted searches**
- ✓ **Selected text**
- ✓ **Drawn area**
- ✓ **Entire page**

KEY BENEFITS

SECURE

Your end users simply see the redactions; privileged parties can still search and reveal underlying text.

FAST

Speed up your process by keeping it in line and agile.
Apply redactions across the entire room in one action.

FLEXIBLE

Redact full pages, paragraphs or even a single letter to ensure compliance with evolving regulations.
